About This Game

The most popular blocks fall down game of all time now in retro VR room. Play it with keyboard or game controller.

Prepare for the retro blocks, geometric shapes composed of four square blocks each. A random sequence of blocks fall down the playing field. The objective of the game is to manipulate these block object, by moving each one sideways and rotating it by 90 degree units, with the aim of creating a horizontal line of ten units without gaps. When such a line is created, it disappears, and any block above the deleted line will fall. When a certain number of lines are cleared, the game enters a new level. As the game progresses, each level causes the blocks to fall faster, and the game ends when the stack of blocks reaches the top of the playing field and no new blocks are able to enter. Some games also end after a finite number of levels or lines.

Great game, Great price. Play at night!

What's not to like?. Best game if you are feeling like you need crazy items to kill someone. 10-10. Hello and welcome to my review of Ironclads: American Civil War. Where do I begin with this piece of crap. First things first, a key feature that is in every modern game is not there, an options menu. Without the ability to a just sound, resolution, and other normal options, this game is a pain as the music is way too loud. When you start a level, you have to click a button to begin loading, I sat there for 7 minutes thinking somthin was wrong with the game, I would understand if you had to begin the level, but to begin loading, and it doesnt help that the sound stops completely so you think the game is frozen. Then when you get into the level there is no tutorial what so ever, nothing that tells you what to do or how to do it. This wouldnt be a problem if there werent so many damn commads to give. All you d know is that there is enemy ships near by and you have to destroy them, thats it, thats all they tell you. The ships move in a stiff path that either curves way more than you wanted to or is to straight, attacks have bare minimum animation. Bottom line, this game sucks, and the only thing that keeps me from giving it a 1V10 is the fact that is the Civil War, and I got it for 90% off (\$.99). Ironclads: American Civil War gets a 2V10, dont buy this game, it has no redeeming qualities.. I am so far enjoying this game. It's for sure giving me the spooks. The game does still leave me asking lot's of questions but I have not completed the game yet, so I'm sure that all will be answered. I also enjoy that there are different people that you play as as the story unfolds. I did a video of the first part of the game. The link will be below if you are interested. Thanks.

<https://youtu.be/P2yKgsBewb0>. devs left this game to die. its unfinished and could of gone. Extremely fun! I love the feature of being able to design your own units. Although this game does get boring eventually, it is still worth buying and you will thoroughly enjoy it!

Also, try not to grind easy levels too much- it can ruin the fun!

. I spent very little time with this game. But as a gamer who has spent a ridiculous amount of time with games like Europa Universallis, Victoria 2, and many others like it. I was dissapointed at the steepness of the learning curve and the complexity and difficulty of performing simple tasks. The incredible shoehorning of forcing the player into roughly 5 or 6 scenarios with set turn limits was extremely limiting and dissapointing.. It is free, it is not a game, just sit and watch. And fear not thtat helpful mainly as i cannot have both this up and the game up at the same time which is why people used to get tstragey guides to do. Quite expansive game. Had a few problems with Warehouses not showing up when trying to buy wares on the global market. Also the workers being unassigned from the production line, as soon as i closed down the window of the building. Otherwise allright game

Mindless Running is a frustrating, poorly thought out platformer. Your goal is to either make it to the end of a level or go as far as you can, but some characters make it literally impossible. 3V10. In this game you have to be fast. You don't need to know anything else to buy it.. A clever puzzle-platformer with fun co-op and some challenging timey-wimey levels. The only downside is that there's really no replay value, so an update every now and then would make it even better.. This game is pretty sick. I completely recommend snatching it up at 2\$ its a steal.. What the ♥♥♥♥ is the point of this game. Run Out and Die...there's your title. Holy♥♥♥♥♥♥♥♥ I can't believe I payed for this....

EDIT OK, I get it now, it's a peice of♥♥♥♥♥♥♥♥ 10 tries and the same god damn result. I'm not insane, you are, for thinking you should get any money for this garbage. Holy♥♥♥♥♥♥♥♥whoever did the voice at the death screen, get ♥♥♥♥♥♥♥♥ed, I hate your voice now. Plus you should give up that title for a good game dev to use, great name,♥♥♥♥♥♥♥♥game.

EDITx2 I just got done eating and then taking a♥♥♥♥♥♥♥♥...still feel like ♥♥♥♥♥♥♥♥ this game.

EDITx3 So, I think this game is single handedly the biggest turd ever created. This can't be real. If you just come out and say, "Hey guys, it was all a scam.", I would be fine with it at this point. I keep coming back to this aborted fetus of a game and hoping one of you jagoffs mopped up the after abort and tried again. BUT NO, nothing, NOTHING has changed. I would say quit this line of work and go flips burgers, but you non completing♥♥♥♥♥♥♥♥holes would only slightly brown one side of your half♥♥♥♥♥♥♥♥burger and want 5 more dollars for that garbage.♥♥♥♥♥♥♥♥cancer, I wish you all cancer of the♥♥♥♥♥♥♥♥
